RACHA

Your gateway to DeFi

We facilitate access to the returns generated by **professional DeFi yield farming strategies**, without requiring users to trade, analyze protocols, or actively manage their positions.

THE OPPORTUNITY

A trillion-dollar market accessible to only a few

The **DeFi** ecosystem has evolved from a technical promise into a consolidated **digital infrastructure with real activity.** Today, after more than five years of development, billions of dollars are deployed across **decentralized protocols** that **distribute rewards** to participants.

However, accessing this environment remains **complex, fragmented, and unintuitive** for most people. **RACHA was created to make it** more understandable**, accessible**, and easier to use.

THE BUSINESS

What is Yield Farming?

The model on which RACHA develops its activity

In DeFi, many **protocols require liquidity** to function. To attract it, they **distribute a significant portion of the fees** or interest generated within them to participants. This is known as yield farming.

Put simply, some platforms charge fees when users trade cryptocurrencies, while others generate income by lending assets or facilitating certain operations within the ecosystem. A substantial share of this activity is distributed to those who provide the liquidity that makes everything work, **and that is where RACHA participates.**

Here's a simple example: a user has the equivalent of $10,000 in Bitcoin and wants to exchange it for Ethereum through a decentralized exchange like Uniswap. For making that transaction, they pay a fee. In simplified terms, part of that fee may go to the platform or protocol, and another part is distributed among liquidity providers. That is where RACHA comes in: providing liquidity so this type of transaction can take place and participating in the fees generated by that activity.

THE PROBLEM

The barriers that hold back investors

Participating in DeFi is not simple. The vast majority of users with available capital remain on the sidelines for five critical reasons:

Technical complexity

Challenging interfaces, smart contracts, and complex terminology for the non-technical user.

Wallet management

Creating, securing, and using a wallet correctly requires certain knowledge and adds a layer of complexity for many users.

Protocol selection

There are hundreds of protocols with different risks. Choosing the right one without experience is nearly impossible.

Risk assessment

Factors such as audits, liquidity, volatility, or smart contract risk require constant review and expertise to be properly evaluated.

Constant monitoring

DeFi ecosystem dynamics evolve rapidly and demand ongoing attention. Few people can dedicate the necessary time and focus.

THE SOLUTION

RACHA: access without barriers

RACHA removes all technical and operational barriers to the DeFi ecosystem. Our team develops professional yield farming strategies, **enabling any user —** regardless of technical expertise — **to participate and earn rewards.**

1

The user joins the platform

Participates in RACHA products that best match their profile, **in just a few clicks**.

2

RACHA manages the operations

The team executes optimized farming strategies across established assets and protocols.

3

The user receives weekly rewards

Profits are distributed transparently and automatically.

WHAT RACHA DOES

Real-Time Optimized Strategies

Multi-blockchain

We operate on Ethereum, Solana, Arbitrum, BNB Chain, Base, Polygon, and more L2 networks.

Continuous optimization

Position rebalancing based on APY and market conditions.

Risk management

Smart contract analysis, audits, and exposure limits per protocol.

Being STT: our commitment

Sustainable

Our model is not based on speculation, but on generating value within the DeFi ecosystem. This allows us to generate **rewards for the service** we provide to the system, not from the price performance of the assets.

Traceable

All **operations** are recorded and **verifiable on blockchain** in real time, allowing users to consult and validate the system's activity **at any time**.

Transparent

The wallets used within the system (deposits, operations, and distribution) **are public**, allowing full visibility of the flow of capital at every stage.

BENEFITS DISTRIBUTION

A model that aligns all incentives

The RACHA distribution system is designed to prioritize user **returns,** while ensuring the project's **sustainability** and the community's **organic growth.**

The key principle is simple: **RACHA only benefits when users do.**

Each allocation serves a specific purpose: **rewarding users**, supporting **network expansion**, and strengthening RACHA's structure and ongoing **development.**

User benefit

Direct return on your participation

Affiliate plan

Incentive for community growth

RACHA

Operations, development, and sustainability

AFFILIATION SYSTEM

Growth driven by the community

RACHA incorporates a **structured affiliation system** that allows users to participate and benefit from the growth of the community. By recommending RACHA, users earn commissions based on the profits generated by their network — **creating an organic and sustainable growth dynamic.**

Multi-level network

The system rewards network expansion across multiple levels, incentivizing both direct referrals and deeper network growth.

Automatic rewards

Affiliate earnings are distributed automatically in USDC to your wallet, with no manual processes or intermediaries.

Organic scalability

The model supports community growth in a structured and sustainable way, reinforcing expansion over time.

ACTIVATION

Democratizing access to DeFi

To activate your account and start generating rewards, you only need two steps: acquire a minimum stake in a RACHA product and pay the one-time activation fee.

Activation Fee

30 USDC — one-time payment
Network: Arbitrum

Minimum stake

Buy your first stake in a RACHA product to activate your account.

Start earning rewards

Your positions become active within a maximum of 6 days. Distributions are made weekly and sent automatically to your wallet.

> **Our vision:** A system where anyone, regardless of their technical level or geographic location, can access opportunities within the DeFi ecosystem and build their financial future with freedom.

RACHA
