ONBOARDING RACHA

How to register and buy your first shares step by step

Introduction

Welcome to RACHA.

This document is designed to guide you through your first steps inside the ecosystem, from the moment you receive your referral link to the moment you complete the purchase of your first shares.

The goal is for you to be able to follow the process independently, clearly, and without needing to rely on someone else at every step. At RACHA, access is always granted through an affiliate link and, once inside, you can register either with an external wallet or by email with MagicLink, depending on the option that suits you best.

Step 1. Receive your referral link

To register with RACHA, you need to access the platform through an affiliate link. This link identifies the person who invited you and ensures that your registration is correctly linked within the network.

What you need to do at this stage:

Save the link sent to you by the person who invited you, as this is the link you will need to use to start your registration.

Step 2. Choose how you want to access RACHA

Before registering, the first thing you need to decide is which type of access you want to use.

At RACHA, there are two main ways to access the platform:

- With an external wallet, such as MetaMask or Rabby Wallet.
- With email registration, which creates an Email Wallet through MagicLink, specially designed for those who want to get started in the simplest way possible, without installing a traditional wallet.

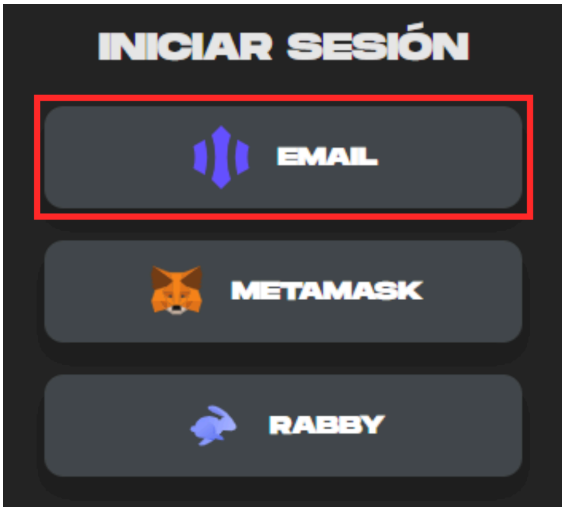
Step 3. Open the link and complete your registration

Once your wallet is ready, or once you have decided to register by email, open your referral link.

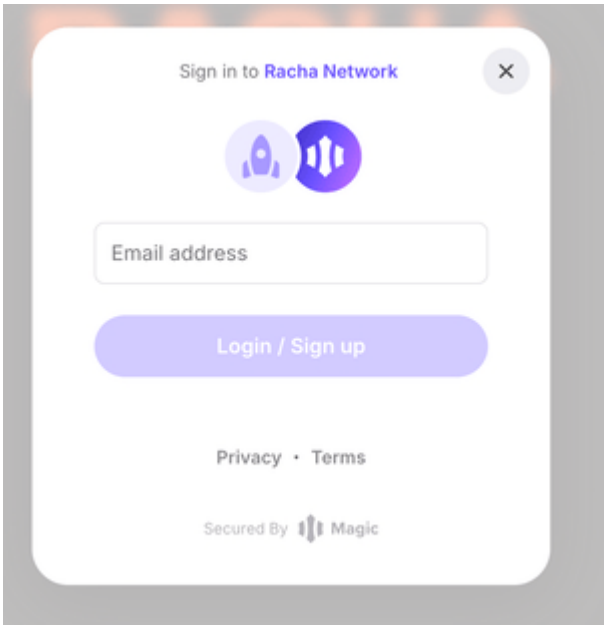
When the page opens, click the **“Register”** button in the top right corner. At that point, you will need to choose the method you want to use to create your account:

- Email
- MetaMask
- Rabby Wallet

Option A. Register with email (MagicLink)



If you choose **Email**, you will need to enter your email address and click **Login/Signup**.



After that, you will receive an email from **noreply@trymagic.com** with a 6-digit code, which you will need to enter on the platform to verify your access.

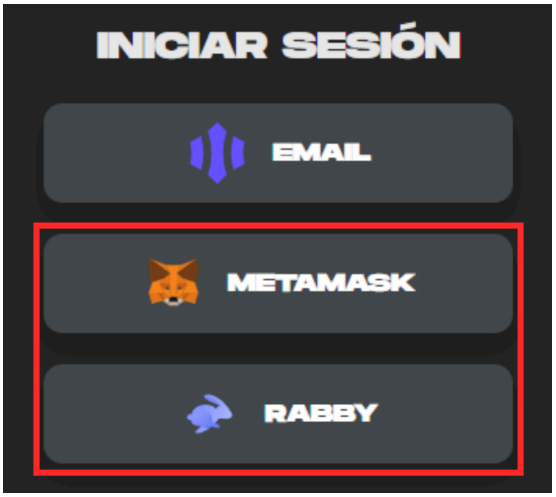
Once that is done, you will only need to:

- Check that your email address is correct.
- Make sure the referral code has been assigned correctly.
- Accept the terms and conditions.
- Complete your registration.

If you use this method, remember that you will always need to use the same one to log in.

Please note that this wallet belongs only to you. RACHA does not have access to it, and you will be able to export your private key whenever needed from the padlock icon inside the wallet section of your backoffice.

Option B. Register with an external wallet



If you choose **MetaMask** or **Rabby Wallet**, you will need to connect your wallet and complete the form with your email address.

You will also need to:

- Check that the affiliate code is correct.
- Accept the terms and conditions.
- Confirm the corresponding declaration before completing your registration.

If you use this method, remember that you will always need to use the same one to log in.

Step 4. Get the funds you need to buy

To buy shares in RACHA, you need to have the following in your wallet:

- **USDC on the Arbitrum network**
- **ETH on the Arbitrum network**, to pay blockchain fees

Share purchases are always made on the Arbitrum network, so you will also need a small amount of ETH to cover transaction fees. In most cases, **$0.50 worth of ETH** is usually more than enough for several transactions.

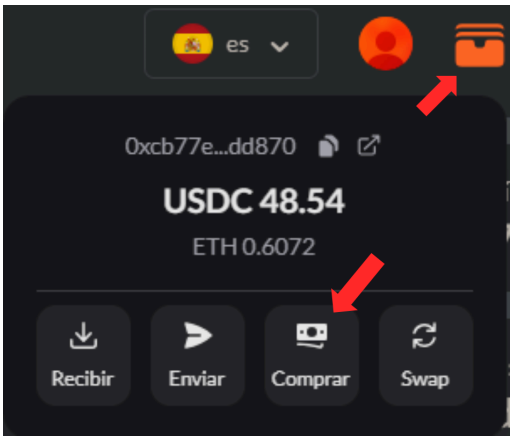
Step 5. Choose how you want to get your USDC

There are several ways to get the funds you need:

Option A. You already have USDC on Arbitrum

If you already have USDC in your wallet on the Arbitrum network, this is the fastest option. In that case, you only need to connect to the backoffice, go to the Marketplace, and complete the purchase directly.

Option B. Buy crypto directly through RACHA with Guardarian



RACHA integrates **Guardarian** so you can buy USDC or ETH directly from the backoffice by clicking on the wallet icon located in the top right corner, just to the right of your profile.

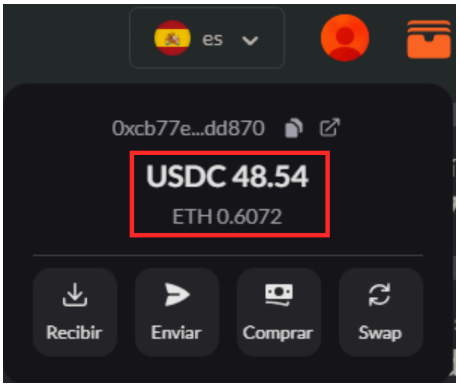
This service allows you to buy cryptocurrencies directly from the RACHA platform. Available payment methods may include debit or credit card, Apple Pay, Google Pay, and bank transfer, among others.

Choose the currency you want to pay with and check how much USDC you will receive. Please note that, depending on the fiat currency used, the fee applied may vary. RACHA

does not charge any fee during this process; only the external provider's fee (Guardarian) applies.

Next, choose the payment method you want to use to purchase the USDC and complete the required details. In some cases, a simple KYC process may be required. This procedure is requested directly by Guardarian, so RACHA will not have access to that information. Normally, Guardarian does not require extended KYC for purchases below **700 USDC**.

Once the process is complete, the USDC will be credited to your wallet. Remember that you will also need ETH to pay network fees, so you will need to follow the same process to acquire it, or ask a teammate to send at least **$0.20 worth of ETH** to your wallet.



Option C. Buy on an exchange and send it to your wallet

Another option is to buy USDC on an external exchange, such as **Binance, KuCoin, or OKX**, and then send it to your personal wallet using the **Arbitrum network**.

It is important that, once you have purchased the USDC, you select **USDC on Arbitrum** when withdrawing the funds and use the correct wallet address.

Very important:

If you send USDC through the wrong network, the funds may not arrive correctly and could even be lost.

Step 6. Choose the product and the number of shares

Inside the backoffice, go to the **Marketplace**, which is the section where you can buy your shares.

Once there, select the product you want to purchase, enter the number of shares you want to buy, and confirm the transaction.

Please note that, on your first purchase, you will need to pay the **RACHA Activation Fee**. This is a one-time payment, and the amount is **30 USDC**.

At the moment, some products have a minimum initial purchase:

- **RAISE Pool:** minimum equivalent to **500 USDC (50 shares)**
- **HOLDEM Pool:** minimum equivalent to **1,000 USDC (20 shares)**

Once you meet the minimum entry amount, you will be able to continue buying additional shares according to the purchase increments allowed for each product.

Before making your purchase, make sure you meet these two conditions:

- You have enough USDC in your wallet
- You have some ETH on Arbitrum to pay for the transaction

In addition, please keep in mind that buying shares in RACHA includes a **1% fee**.

For example, if you want to buy **2,000 USDC** worth of shares, you will need to have at least **2,020 USDC**, plus the ETH needed to cover the network fee.

Step 7. Confirm the purchase

Once you have chosen the product and the number of shares you want to buy, follow these steps:

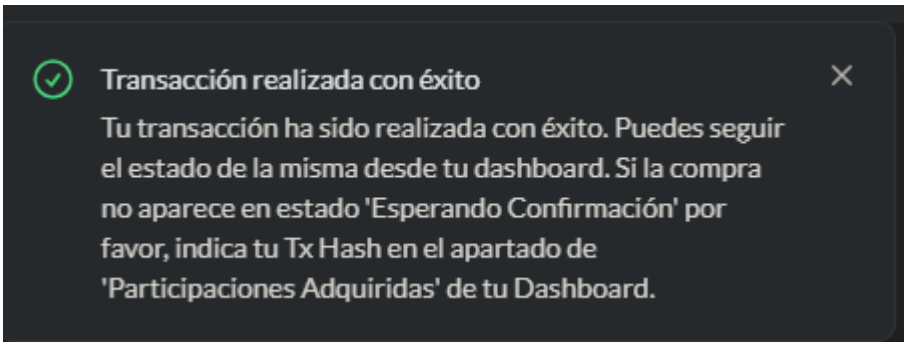
- Accept the terms and conditions.
- Click **Buy**.
- Confirm again when the system asks you to do so.

At that point, your wallet pop-up or extension/app will open, and you will need to confirm and sign the transaction.

Once the transaction has been signed, the funds will be sent to RACHA's **Deposit Wallet**, the blockchain will record the transaction, and the system will automatically assign the corresponding shares to your account.

Step 8. Verify that the purchase was completed successfully

If the process has been completed correctly, a confirmation message will appear and your shares will become active in RACHA.



In addition, each purchase is recorded on the **Arbitrum blockchain**, so it can be verified on **Arbiscan** using your wallet address. This provides greater traceability and transparency for the transaction.
